Bring Your Own Key, Leave the Risks Behind

100 % GDPR-Compliant AI Infrastructure Built Exclusively for UK Estate Agents.

THE BLIND SPOT: UNCONSCIOUS GDPR BREACHES

ARE YOUR AGENTS PASTING CLIENT NAMES, TENANCY AGREEMENTS, OR SENSITIVE PROPERTY BUDGETS DIRECTLY INTO GENERIC CHATGPT MODELS?

Up to £40,000 ICO Fines. The UK real estate sector is strictly monitored. Every copy-paste is a potential data leak.

THE ROUTINE TRAP & LOST INSTRUCTIONS

COMPETITION IN THE UK MARKET IS BRUTAL. IF YOU ARE SLOW RESPONDING TO PORTAL INQUIRIES OR PREPARING PROPERTY DESCRIPTIONS, YOU LOSE THE INSTRUCTION TO THE AGENT DOWN THE STREET.

Drowning in manual admin hell keeps your team away from viewings and closing deals.

PRIVACYGUARD AI: THE BULLETPROOF EDGE

**ZERO-KNOWLEDGE
OPERATIONAL SPEED.**

SECURITY

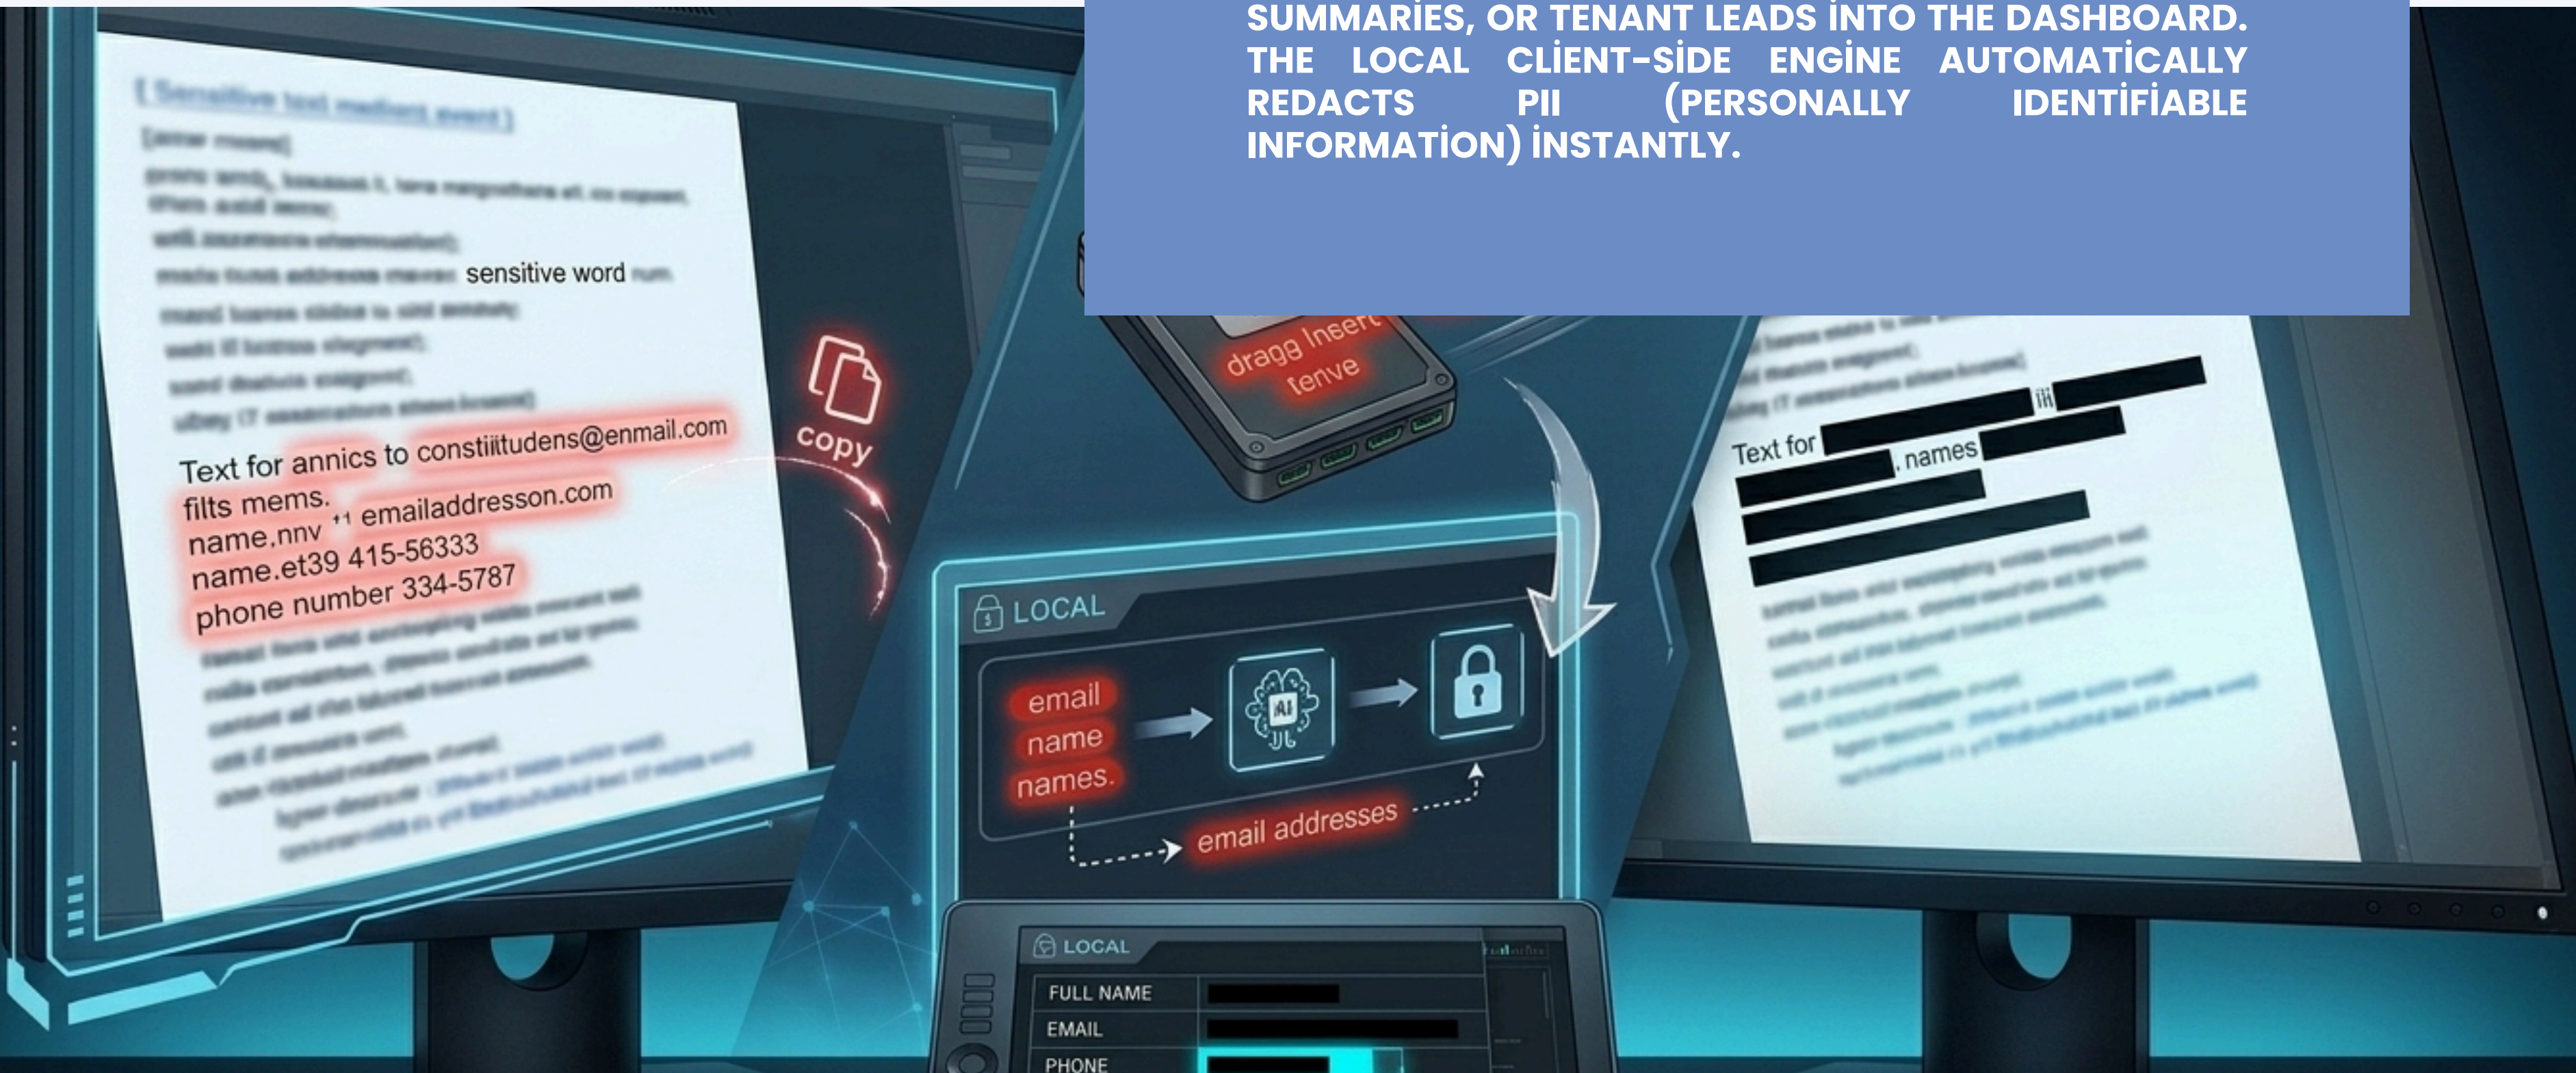

MEET

INFINITE

Your data is never stored on our servers or used for AI training. PrivacyGuard masks sensitive data locally inside your browser before it ever leaves your machine.

STEP 1: PASTE & MASK LOCALLY

SIMPLY DUMP YOUR PROPERTY NOTES, VALUATION SUMMARIES, OR TENANT LEADS INTO THE DASHBOARD. THE LOCAL CLIENT-SIDE ENGINE AUTOMATICALLY REDACTS PII (PERSONALLY IDENTIFIABLE INFORMATION) INSTANTLY.

STEP 2: BRING YOUR OWN KEY (BYOK)

CONNECT YOUR OWN MISTRAL AI API KEY IN LESS THAN 2 MINUTES. NO TECHNICAL BACKGROUND NEEDED. YOU PAY THE RAW INFRASTRUCTURE COST DIRECTLY TO THE PROVIDER—NO MIDDLEMAN, NO HIDDEN TOKEN MARKUPS.

STEP 3: BULK PROCESSING & ZIP DELIVERY

**STOP PROCESSING DOCUMENTS ONE BY ONE. BATCH-
UPLOAD MULTIPLE PROPERTY RECORDS IN MARKDOWN
FORMAT. THE AI GENERATES ALL COMPLIANCE REPORTS
AND PROPERTY DESCRIPTIONS CONCURRENTLY,
PACKING THEM INTO A SINGLE, DOWNLOADABLE .ZIP
FILE.**

Our Local Infrastructure Advantage:

Eliminating third-party SaaS markups through direct provider integration.

THE UNFAIR ADVANTAGE: SIMPLE MATH

Our Edge: Traditional SaaS companies pool your data and charge a premium per token. We provide local infrastructure, ensuring your data remains entirely yours while eliminating vendor markups by letting you use your own API keys.
